

VELUX MODULAR SKYLIGHT (VMS) SERIES

Prefabricated Modular Skylight System for Daylight and Fresh Air Through the Roof

This innovative, prefabricated modular skylight system offers daylight and fresh air through the roof. The unique modular design offers multiple configurations for fast on-site installation and watertight performance. More than just daylight, these skylights offer climate control, ventilation, and shading automation for healthier, beautiful buildings.

Features and Benefits:

- One-step approach to adding more daylight, ventilation, and indoor climate control
- Available in 8 configurations to fit a multitude of new and retrofit building needs
- Prefabricated modular design creates a seamless, watertight system
- Available in fixed or venting modules for a uniform, cohesive skylight system aesthetic
- Electric-controlled, venting modules open to increase fresh air and indoor air quality
- Exceptional energy-efficiency with 2 or 3-layer glazing and multiple coating options
- Prefabricated, click-on cladding and flashing components for fast, watertight installation
- Optional integrated roller shades for daylight and glare control
- Automated operation through building management system programming or via manual wall switch operation
- Elegant, sleek design with integrated, hidden motor and sash-frame construction
- 10-year warranty coverage of workmanship, glass and finish

Code Compliance:

- WDMA Hallmark Certified
- Air/Water/Structural testing (ASTM E283,E330, E331)
- NFRC tested and rated
- Static (Dead) Load Tested
- Dynamic (Drop Weight) Load Tested
- IAPMO-ES Certified
- Meets IECC/IBC/IRC/FBC/Title 24 requirements for energy and building code compliance
- E1886/E1996 Impact Resistant

Ideal Applications:

Offices

Public Buildings

Education

Healthcare

Retail and Shopping Malls

& Many More
