

*Parasoleil*

## Pattern Mapping for Lasting Design

Parasoleil is the leader in laser cut architectural panels for the Architectural & Design Industry. This programme is a study in the practical use of patterned panels for interiors, shade, screening, railings and cladding.

Delivered as a one hour fast-paced course, it will feel more like watching a TED Talks than a traditional presentation. The content is perfect for Architects, Interior Designers, Landscape Architects, General Contractors, Owners and Specifiers.

- **Learning Credits:** 1 HSW AIA CEU and 1 ASLA CES
- **Duration:** 60 minutes

### Programme Outline:

- About Parasoleil
- History of patterns
- How we detect patterns (vision)
- Reasons to add patterns to a project
- Pattern mapping
- Design considerations
- Best practices
- Process
- Applications & case studies
